Be a Bee

Explore our garden through the eyes of a honey bee. Visit our bee hives and learn some fascinating facts about bees. Plant a flower to take back to school.

£6
per child

Colour Crazy Flowers

Walk around the garden and observe the flowers and plants. Make a mini palette of colours from the garden. Discover what plants need to grow and thrive. Collect resources and make a natural flower to take home.

£6
per child

Nest Building

Act as birds and make yourself a nest. Remember birds only have beaks and therefore the children can only use their thumb and forefinger. No talking, only squawking. Award for the best nest.

£6
per child

Minibeast Hunting

Create a large-scale model of your favourite minibeast through junk modelling! Then use the models to talk to the group explaining why they chose that minibeast and share facts about their crazy creature.

Worms, Worms and more Worms

There are many different species of earthworm and they are an enormously important animal. Learn how important they are to help our soil be great! Look at our wormery and see them make patterns. Have fun being a worm, rolling down our grass hills!
