

**KS1**

**£6**  
per child

## Shapes Everywhere

From finding shapes and using estimation to working out the height of a tree, or the width of a pond your children will be challenged and supported to solve mathematical problems in our grounds. This fun session will test teams of mixed-ability children to use their analytical and creative brains.

**£6**  
per child

## Maths can be fun!

A fun session that will demonstrate the power of play when learning and applying maths. Children are encouraged to explore the outdoor environment and collect natural materials. Using these natural materials they then measure various body parts and record their findings – do you get similar results to your friends? Are there any surprising results?

**£6**  
per child

## Butterfly Symmetry

Learn what the differences and similarities are between halves and wholes. "Have you ever seen things that are symmetrical? What animals are symmetrical?". Children will then complete a template of a butterfly and create symmetrical patterns using colours

**£6**  
per child

## Story Explorers

Ready for an adventure? Explore different parts of the garden and bring the words of poems and stories to life.

Students will be able to:

- Listen to stories and sounds in nature.
- Use senses to explore the living world.
- Create a collection of different materials to observe and use in imaginative role play.
