

3D Shape Structures

Children are challenged to work in small groups using the given materials to build the biggest 3D structure.

How many shapes have you created?

Angles Outside

Angle Hunt - find different examples of each type of angle and estimate the size of the angles they find. They can record this in table on the online activity sheet "angles outside" and draw the angle they find. Then using various given objects can you create a shape with 12 angles?
