

KS3

3D Shape Structures

Children are challenged to work in small groups using the given materials to build the biggest 3D structure.

How many shapes have you created?

Origami Butterfly

Children work in small groups to explore the garden and find objects that are symmetrical. Draw the outline of these shapes on your activity sheet including the line of symmetry. Then back to the workshop to create your own symmetrical origami butterfly.

Flying High

Create your very own kite –measure, cut and piece together various shapes and materials trying to work out what works best to get that kite the highest.
